

Special Issue

Sustainable Strategies for Pest Management in Plants and Animals

Message from the Guest Editor

As the need to grow more food increases, environmentally friendly protocols, products and strategies are urgently needed to achieve sustainable management of agricultural and medically important pests. Although some ground-breaking research ideas have been studied, and some biorational pest management technologies have been successfully developed and commercialised, the commercial uptake of these technologies could be higher globally. This Special Issue allows investigators to collate high-quality review and research papers on sustainable pest management approaches, covering new scientific discoveries and applied aspects, including field, greenhouse, and predictive studies. The objective is to share new insights and data and enhance innovation in sustainable pest management.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
