

## Special Issue

# Advances and Challenges in Reliability and Maintenance Engineering

### Message from the Guest Editor

With the development of manufacturing technologies such as those promoted by Industry 4.0, reliability and maintenance engineering are increasing in importance due to rising amounts of equipment, systems, fleets of systems, machinery and infrastructure. This brings new challenges to production processes, cyber-physical systems and technology systems. Therefore, this Special Issue intends to present new ideas and solutions in the field of risk analysis, prognostics and health management, dependable cyber-physical systems, self-X in maintenance and dependability, as well as predictive maintenance.

---

### Guest Editor

Prof. Dr. Benoit Iung

CRAN (Nancy Research Centre for Automatic Control, UMR CNRS 7039), Lorraine University (UL, France), Vandœuvre-Lès-Nancy, France

---

### Deadline for manuscript submissions

closed (20 September 2024)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
