

Special Issue

Novel Insights into Medical Images Processing

Message from the Guest Editors

This Special Issue aims to compile new contributions to medical image processing from acquisition to analysis and interpretation. Contributions from other areas and multidisciplinary research are welcome. We warmly encourage you to contribute to this collection in *Applied Sciences*. Areas of focus include, but are not limited to, image processing and analysis; medical image devices; image classification and segmentation; machine learning and deep learning for medical images; optical and photonics biosensing; development of CADe and CADx tools; medical measurements and instrumentation; biomedical image analysis; virtual reality in medicine; IoT in medicine; biosignal processing; and embedded systems.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief
