

## Special Issue

# Application of Radiation in Wastewater Treatment

### Message from the Guest Editors

This Special Issue aims to present recent advances in the research and applications of ionizing radiation in treating municipal and industrial wastewaters, alone or in combination with other processes. Among other topics, we welcome the submission of papers that address the optimized treatment conditions/methodologies employed for the degradation of pollutants and their reaction mechanisms, kinetic modelling, the inactivation of microorganisms, and toxicity assessment and economic evaluation, involving experimental and pilot-scale applications. In this context, we welcome the submission of original, communication and review articles addressing the feasibility and sustainability of this technology.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
