Special Issue

Techniques and Applications of Natural Language Processing

Message from the Guest Editors

Recent developments in large language models have revolutionized the field of natural language processing, resulting in a wide range of applications such as chatbots, content generation, language translation, sentiment analysis, question-answering systems, and personalized recommendations. However, several problems such as scalability, hallucination, biases, privacy, ethical issues, fairness, the effective tokenization of low-resource languages, multilingual capabilities, and efficient fine-tuning techniques of models demand further attention. This Special Issue aims to address the aforementioned challenges by inviting scholarly contributions that advance processing techniques and applications in the field of NLP. We welcome original research articles, best practice papers, and review papers that report the development of NLP models, algorithms, and applications. For more information on the Special Issue, please visit LINK https://www.mdpi.com/journal/applsci/special_issues/A 5F0UZ6A61

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
