Special Issue

Artificial Intelligence for Health and Well-Being

Message from the Guest Editors

Artificial intelligence is poised to change the world in the coming decades, from the way we do business to domestic applications. Artificial intelligence gives systems the ability to learn and make decisions, benefiting areas such as medicine and well-being. This Special Issue aims to disseminate the latest research results and developments in artificial intelligence for health and well-being. We at inviting researchers and practitioners to contribute their high-quality original research or review articles on these topics to this Special Issue. Topics of interest include, but are not limited to:

- Machine learning in health and well-being;
- Data analysis in health and well-being;
- Social robots;
- Affective computing;
- Medical image processing;
- Intelligent medical devices and sensors;
- Medical expert systems;
- Explaining AI in medical systems;
- Computer-aided diagnosis.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
