Special Issue

Artificial Intelligence in Transport and Logistics

Message from the Guest Editor

Artificial Intelligence has succeeded in revolutionizing various aspects related to our everyday life, both in normal and pandemic life conditions. Transportation represents one of the base structures of our modern life as it insures the proper movement of goods, people and animals from one location to another, either by air, sea, road, cable, pipeline or space. On the other hand, logistics offers the needed knowledge for planning, implementing and controlling procedures that can ensure an efficient and effective transportation and storage of goods. In this context, the Special Issue is dedicated to the practical applications of Artificial Intelligence in transportation and logistics and plans to give an overview of the most recent advances in this field. This Special Issue is aimed at providing selected contributions on advances in both transportation and logistics by means of Artificial Intelligence. Additionally, the authors are encouraged to submit papers addressing the state-of-the-art or case studies featuring practical applications of Artificial Intelligence in transportation and logistics under various conditions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
