

Special Issue

Advanced Human-Robot Interaction

Message from the Guest Editors

We are inviting submissions to a Special Issue on “Advanced Human-Robot Interaction”. Human-robot interaction (HRI) is rapidly becoming a significant research field and one of the central issues in the development of smart homes. Robots and robotic devices enable the human population to perform numerous tasks improving speed and safety. Beyond typical routine tasks, robots are gradually becoming an integral part of daily human activities and expanding in different, previously unexplored domains. As such, human-robot social interaction, virtual/augmented reality interaction with robots, autonomous vehicles, medical robots, drones, and drone swarms are some of the few advances attracting primary interest from the research community. Techniques to improve human-robot interaction, machine learning for robot activities, simulations, and user experience could further unlock the full potential of robots and support their subtle integration into current and future societies.

Guest Editors

Prof. Dr. Vassilis Charissis

School of Computing, Engineering and Built Environment, Glasgow Caledonian University, Glasgow G4 0BA, UK

Prof. Dr. Dimitris Drikakis

Institute for Advanced Modeling and Simulation, University of Nicosia, Nicosia CY-2417, Cyprus

Deadline for manuscript submissions

closed (20 July 2024)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
