

Special Issue

Advanced Research in Electronics: The Perspective of Women

Message from the Guest Editor

In the past years, Electronic Engineering has been considered a purely male research field. This is evidenced by the number of women involved in both studies and job positions in this field, which is still much lower than the number of men. However, in Electronics, women have reached very high levels and they have made a decisive contribution both in the academic field and in technological progress. Based on these considerations, this special issue aims to collect contributions that can serve both to encourage girls to undertake these studies, and to make visible and to celebrate the achievements of women researchers from all over the world who focus their research on Electronics. Contributions to this issue in which women are the first author or one of the corresponding authors can be submitted as original research articles or reviews, and can cover any topic in the field of Electronic Engineering. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
