

Special Issue

Recent Advancements in Food Technology

Message from the Guest Editor

This Special Issue will be devoted to modern solutions found in modern food technology. Currently, more and more consumers are oriented towards the search for food of high quality at a fairly low price. This state of affairs motivates technologists and scientists to search for new raw materials, processing methods and food preservation technologies. In this issue, we welcome both original papers and review articles.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
