

Special Issue

Advances in Biomedical Signal Processing

Message from the Guest Editor

Recently, biomedical signal processing has brought relevant progress for solving several problems in many areas of biomedical engineering. Today more than ever, the extraction of information hidden in bio-signals plays a crucial role in understanding the secrets of how our body works. Despite the recent impressive progress, new diseases represent a future challenge and biomedical signal processing will continue to play an irreplaceable role for early diagnosis. The aim of this Special Issue is to present and discuss the most recent advances in biomedical signal analysis and processing. I am inviting original research work including novel theories, innovative methods, and advanced systems that introduce significant advances in applied biosciences and bioengineering. **Keywords:**

- multidimensional bio-signals processing
- non-stationary bio-signals analysis
- advanced systems for bio-signal prediction
- reconstruction of bio-electric sources
- bio-signals modeling
- automatic systems for artefacts reduction
- wearable medical devices

Guest Editor

Dr. Fabio La Foresta

Department of Civil Engineering, Energy, Environment and Materials (DICEAM), Mediterranean University of Reggio Calabria, Via Zehender, I-89122 Reggio Calabria, Italy

Deadline for manuscript submissions

closed (20 October 2020)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
