

Special Issue

Current Status of Agricultural Soil Pollution

Message from the Guest Editor

This Special Issue main focuses on research that describes the remediation of soil and water contaminated with heavy metals and organic pollutants, migration of heavy metals and organic pollutants in the soil–plant and microorganism systems, and toxicity and bioavailability of metals and organic pollutants and nanomaterial. The topics of interest to be covered by the Special Issue include but are not limited to the following:

- Evaluation of ecological environment of soil during remediation of polluted soil;
- Toxicity of the degradation products of organic pollutants;
- Catalytic degradation of organic pollutants by novel materials and nanomaterials.

Guest Editor

Prof. Dr. Cuiping Wang

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
