

## Special Issue

# Application of Restorative Dentistry

### Message from the Guest Editor

Restorative dentistry pertains to the diagnosis and comprehensive management of diseases of acquired tooth loss, and its restoration according to functional and aesthetic requirements. Due to the development of dental materials and the aesthetic requirements of patients, restorative dentistry has become more relevant, providing a successful form of rehabilitation. The main goal of this Special Issue is to outline current best practices and provide recommendations on promising developments in the field with a special focus on novel materials and their application.

- restorative dentistry
- endodontics
- biomaterials
- bioceramics
- dental rehabilitation

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
