Advanced Assessment of Resilient Systems

Message from the Guest Editors

New methodologies that apply resilience as a key concept in civil engineering have been recently proposed for the assessment of structural vulnerability. The recent advances in numerical simulations allow researchers to include the effects of resilience on the evaluation of the effects of natural hazards on civil systems such as buildings, bridges, roads and infrastructures. This call aims to bring together contributions from multiple disciplines to discuss the state of the art on numerical simulations to resilience sciences, sharing present and future perspectives.

Guest Editors

Prof. Dr. Davide Forcellini

Dipartimento Economia e Tecnologia, Università di San Marino, Via Consiglio dei 60, n.99, 47899 Dogana, San Marino

Prof. Dr. Fernando Fraternali

Department of Civil Engineering, University of Salerno, 84084 Fisciano, Italy

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
