

Special Issue

Assistive Technology: Biomechanics in Rehabilitation Engineering

Message from the Guest Editor

This Special Issue will focus on the use of technology to address biomechanical and control of movement issues in individuals with impaired health, whether as a result of disability, disease, or injury. The research can include (but is not limited to) development of new technology to promote more effective movement, the use of existing technology to assess and treat movement disorders, the use and effectiveness of virtual rehabilitation, or theoretical issues such as modeling which underlie the biomechanics or motor control of movement disorders.

Guest Editor

Dr. Philip Fink

School of Sport, Exercise and Nutrition, Massey University of New Zealand, Palmerston North, New Zealand

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
