

Special Issue

Advances in Diagnostic and Therapeutic Radiology – 2nd Edition

Message from the Guest Editor

This Special Issue focuses on the wide range of advances in the different clinical and technical aspects of medical imaging, both diagnostic and therapeutic nuclear medicine, radiation oncology, radiation protection, and the biological effects produced by ionizing radiation. This broad spectrum of topics includes articles on all aspects of clinical and/or basic research that describe original observations, techniques, instruments, new technologies, and meta-analyses.

- radiography
- computed tomography
- positron emission tomography
- magnetic resonance imaging
- ultrasonography
- digital subtraction angiography
- image-guided interventions
- fluoroscopy
- mammography
- radiotherapy
- nuclear medicine
- radiation protection
- radiation effects

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
