

Special Issue

Environmental Pollutant: Analysis, Monitoring and Emerging Processes for Abatement

Message from the Guest Editors

Emerging contaminants (PFAS, pharmaceuticals, flame retardants, etc.) are widely distributed in the environment due to being directly discharged from anthropogenic sources and/or their slow degradation in wastewater treatment plants. This Special Issue welcomes scientific articles focused on the use of physical and chemical processes able to remove pollutants from water, soil and air, as well as their analysis using innovative analytical methodologies and their continuous monitoring.

Guest Editors

Dr. Iván Sciscenko

Departamento de Ingeniería Textil y Papelera, Universitat Politècnica de València (UPV), Plaza Ferrándiz y Carbonell s/n, 03801 Alcoy, Spain

Prof. Dr. Ana María Amat

Grupo de Procesos de Oxidación Avanzada, Departamento de Ingeniería Textil y Papelera, Universitat Politècnica de València, Campus de Alcoy, Alcoy, Spain

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
