

Special Issue

Photobiomodulation and Photodynamic Therapy in Dentistry and Oral Science

Message from the Guest Editors

This Special Issue aims to update the literature and discover new trends in photobiomodulation and photodynamic therapy in dentistry. Photodynamic therapy and photobiomodulation have shown very encouraging results in vitro. However, there is still no solid evidence regarding their efficacy in some specific areas of dentistry, such as periodontology. All this arises from the extreme inhomogeneity of the clinical protocols used and described in the literature, making it almost impossible to compare the results in systematic reviews. All types of manuscripts are welcome, ranging from original articles to literature reviews that will address this topic with innovation and accuracy.

Guest Editors

Dr. Morena Petrini

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
