

## Special Issue

# Performance Evaluation, Optimization and Algorithmic Enhancements for Concentrated Solar Technologies

### Message from the Guest Editor

Concentrated Solar Technologies can be applied for power generation and industry, etc., to provide an excellent choice for renewable energy in the present and future. This Special Issue focus on “Performance Evaluation, Optimization and Algorithmic Enhancements for Concentrated Solar Technologies”. It welcomes new numerical methods and their application to new concentrated solar technologies, as well as related topics such as their application to the special local area and the validation of methodologies through experiments. Papers selected for this Special Issue were subject to a rigorous peer-review procedure with the aim of rapid and wide dissemination of research results, developments, and applications.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
