Oral and Maxillofacial Surgery: Risk Management and Postoperative Recovery

Message from the Guest Editor

I can announce a Special Issue titled “Oral and Maxillofacial Surgery: Risk Management and Postoperative Recovery”. Today, risk assessments, the prevention of accidents and reducing operative and post-operative complications are among the most relevant topics. Increasing their care load makes clinicians vulnerable to making errors, and young colleagues are particularly predisposed to making mistakes due to their inexperience or poor tolerance of the workload. In some cases, no apparent errors are made but an adverse event can happen anyway. In some cases, such events end without consequences, but, in other cases, they cause serious injury to the victim and, sometimes, even death. In surgery, the post-operative recovery period is the time when most accidents occur. Therefore, I invite you to send your valuable contribute for publication in this Special Issue, because reducing the risk of adverse events and guaranteeing our patients the best possible safety must be our priority.

Guest Editor

Dr. Luciano Maria Catalfamo

Department of Biomedical, Dental and Morphological and Functional Imaging (BIOMORF), University of Messina, 98122 Messina, Italy

Deadline for manuscript submissions

20 June 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
