Special Issue

Big Data in Geocomputation for the Built Environment

Message from the Guest Editors

Welcome papers should provide, through real-life case studies, clear evidence of the benefits arising from the adoption of geocomputational models and methods. The papers must cover both the theoretical and the experimental aspects. Contributions on the following topics are particularly welcome:

- Citizen sensing and open data;
- Crowdsourcing and citizen science data;
- Geospatial uncertainty;
- Spatial databases;
- Spatial data mining;
- GISs technology;
- Open geospatial science;
- Agent-based spatial modeling;
- Cellular automata spatial modeling;
- Spatial statistical models;
- Environmental modeling;
- Urban modeling;
- Land use dynamics;
- Geographic visualization and visual analytics;
- Complex systems analysis;
- Machine learning methods for environmental planning;
- Built environment;
- Environmental protection;
- Case studies.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
