

Special Issue

Bio-Inspired Robotics II

Message from the Guest Editors

The evolution of robotics has enabled today's robots to operate in a variety of unstructured and dynamically changing environments in addition to traditional structured environments. Robots have thus become an important element in our everyday life. This Special Issue invites original papers of innovative ideas and concepts, new discoveries and improvements, and novel applications and business models relevant to the following selected topics of "Bio-inspired Robotics".

- Biomimetic robots
- Bio-inspired manipulation
- Bio-inspired learning and control
- Bio-inspired sensory-motor coordination
- Bio-inspired robot design and application
- Bio-inspired computation for robots
- Bio-inspired robotic locomotion
- Cyber-physical biosystem
- Bio-inspired robotic cell assembly and tissue fabrication
- Symbiotic robotic system and swarm intelligence

Guest Editors

Prof. Dr. Toshio Fukuda

Assoc. Prof. Qing Shi

Dr. Fei Chen

Prof. Dr. Wisnu Jatmiko

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
