

Special Issue

Bioactive Compounds from Natural Products: Separation, Characterization and Applications

Message from the Guest Editor

This issue aims to publish new and innovative research that could demonstrate the therapeutic potential of natural health products by in vitro and/or in vivo biological activities relevant to prevent or to alleviate degenerative diseases. The interaction of natural health products with human microbiota represents an essential aspect because it could modulate the microbial pattern and alleviate more of the chronic disease's effects in case of type 2 diabetes, cardiovascular dysfunctions, neurodegenerative diseases, and inflammatory colon pathologies. Additionally, you are invited to send research based on the effect of different extracts or functional foods used in degenerative pathologies and interactions with human microbiota. We aim to identify new data on in vitro/in vivo research that could demonstrate the bioavailability of natural compounds and the relation with antioxidant/antimicrobial capacity. Modulated microbiota aspects are expected to be published, based on the interaction with natural compounds, natural sweeteners or other molecules that influence the colon health status.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
