

## Special Issue

# Biomass Energy and Biomass as a Clean Renewable Fuel

### Message from the Guest Editors

This Special Issue will focus on sustainable energy systems. On the one hand, several innovative and alternative concepts could be presented, but also the topics of energy policy, circular economy, life cycle assessment and supply chain could play a major role. Models on various temporal and geographical scales could be developed to understand the conditions of technical, as well as organizational change. New methods of modeling, which can fulfil technical and physical boundary conditions and nevertheless consider economic environmental and social aspects, could be developed. **Keywords:** Biomass energy; New business models; Biomass conversion technologies; New biomass processes; New biomass products; Biomass supply chains; Sustainable biomass energy systems; Circular economy; Sustainability

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
