

Special Issue

Biomass Energy Utilization Systems

Message from the Guest Editor

This Special Issue will focus on Biomass Energy and will cover some emerging and real-world application research topics concerning new trends in applied databases. We welcome high-quality and original works in these areas that have not been published. The selected proposed manuscripts will be subject to a careful peer review and editorial process. Topics include, but are not limited to the following:

- Biomass Quantification and Inventory
- Woody Biomass Harvesting Systems
- Evaluation of Harvesting Systems
- Logistic Models for Biomass Supply
- Power Generation–Steam Cycles
- Thermal Facilities
- Pyrolysis, Gasification and Carbonization

Keywords: biomass; bioenergy; combustion; pyrolysis; gasification

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
