

Special Issue

Biomimetic Smart Materials and Devices in Medicine

Message from the Guest Editor

Modern medicine is taking advantage of continuous progresses in biomedical engineering. This Special Issue is dedicated to presenting the most promising recent research advancements of new hybrid and smart materials for biomimetic and bionic devices and innovative biomechanical research approaches, as well as reviewing results from a broad category related to the application of biomedical engineering with new biomimetic metals, ceramics, polymers and their combinations in nanocomposites and hybrid materials. The aim of this Special Issue is to outline the convergence between clinical applications and biomedical engineering from the perspective of innovative materials science and technologies.

Guest Editor

Prof. Dr. Antonio Apicella

Department of Architecture and Industrial Design, Università della Campania, Luigi Vanvitelli, 81031 Aversa, Italy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
