

Special Issue

Synthesis, Characterization and Applications of Biopolymer Aerogels

Message from the Guest Editor

In this issue, we aim to highlight the use of biopolymers such as cellulose, alginate, chitosan, starch, chitin, proteins, etc. for the production of aerogels in the form of monoliths, microbeads, fibers, papers (sheets), microparticles, foams, and so on. We encourage authors to contribute original research papers, communication and review articles related to current developments, and applications in the area of biopolymer aerogels.

Guest Editor

Dr. Seeni Meera Kamal Mohamed

Department of Aerogels and Aerogel Composites, Institute of Materials Research, German Aerospace Center (DLR), Linder Hoehe, 51147 Köln, Germany

Deadline for manuscript submissions

closed (30 October 2022)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
