

Special Issue

Biomaterials for Bone Tissue Engineering

Message from the Guest Editor

Applied Sciences invites submissions to this Special Issue on the broad field of Biomaterials for Bone Tissue Engineering.

Bone tissue engineering field aims at the development of artificial bone substitutes that restore (partially or totally) the natural regeneration capability of bone tissue lost under circumstances of injury; significant defects; or diseases, such as osteoporosis. In this context, biomaterials are the keystone of the methodology.

In this Special Issue, we encourage submissions of cutting-edge original research works in this field. We expect to receive contributions from different areas of multidisciplinary research, including – but not restricted to—the synthesis, fabrication, characterization, and experimentation of biomaterials in bone tissue engineering applications. Modeling and simulation of biomaterials research papers are also expected in order to emphasize the importance of this tool in the design stage, as well as virtual testing of complex phenomena that takes place in these applications. Comprehensive review and survey papers are also welcome in this Special Issue.

Prof. Dr. José A. Sanz-Herrera

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
