Building Stones: From Characterization to Conservation

Message from the Guest Editors

Stone is the architectural figure of the historical-monumental buildings of many urban centers, often UNESCO sites, which represent a unique wealth in the world. Stones are employed not only in monuments and works of art, but also in ordinary buildings which are part of our historical, cultural, and architectural heritage. This important widespread monumental cultural heritage is progressively subject to degradation, both for natural and anthropogenic causes, and it needs to be protected through proper interventions which require a multidisciplinary approach, involving different specialists, and encouraging a teamwork. We are pleased to invite you to give a contribute to this Special Issue, whose target is to update the knowledge on natural stone, with a wide range of contributes following the slogan: from quarry to building and from building to quarry. We hope for a large participation with upstanding original research articles and reviews, and look forward to receiving your contribute.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
