

## Special Issue

# Carbon-Related Nanostructures: Fabrications and Applications

### Message from the Guest Editor

The topic of “Carbon-Related Nanostructures: Fabrications and Applications” covers a vast research area, partially overlapping with nanocarbons such as graphene, carbon nanotubes, carbon black, and activated carbon, for medical, electronic, energy storage/conversion devices usages, and so on. This Special Issue is devised as a collection of articles reporting both concise reviews of recently obtained results, and new findings produced in this broad research area. The topics are not limited strictly to traditional nanocarbons and applications, but are assumed to address related fields, such as new carbon structure, polymer, composite, and new real or potential applications. We welcome your submissions!

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
