

## Special Issue

# Advances in Cellulosic Nanofibers and Their Applications

### Message from the Guest Editors

Applications of cellulosic fibers can be applied in a large variety of areas, such as sustainable and intelligent packaging, membranes, food additives, paper/cardboard reinforcements, electrical components, catalysts, biosensors, tissue engineering, analytical chemistry, and biomedical application, among others. This Special Issue aims to bring together eminent scientific works related to cellulosic fibers and their applications. The main focus of this SI is the valorization and maximized use of alternative raw materials, as well as the use of cellulose in relevant applications of societal benefit. **keywords:**

- agri-food raw material
- lignonanofibers
- cellulosic nanofibers
- 3D printing
- membranes
- reinforcement
- production
- packaging
- composites

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
