

Special Issue

Latest Advances in Cement and Concrete Composites

Message from the Guest Editor

The construction industry is striving towards innovation in building materials and technology. Optimising material characteristics is a strategic goal aligned with the need for sustainable construction and durable structures. Composites are proven to have the potential for innovative applications in the construction industry where the material properties can be fully utilised. In particular, cement and concrete composites have undergone significant advancement and are the core theme of considerable amounts of research in recent times. Therefore, in this Special Issue, we invite researchers interested in various aspects of the characterisation and durability of cement and concrete composites to contribute and share their findings and achievements. The aim is to provide a platform for the research community to advance cement-based composite technology and facilitate practical applications in the industry.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
