Current Challenges of Oral and Maxillofacial Surgery

Message from the Guest Editor

Maxillofacial surgery is one of the most dynamically developing fields of surgery. Despite this, often, we face new challenges. In different parts of the world, this field of surgery consists of different parts. I propose to focus on four sections: treatment of injuries, correction of deformations, fight against malignancy and the therapy of infections. I encourage you to share with a wide range of readers their successes in breaking down the barriers that lie ahead. I would like to show how modern and beautiful is the current maxillofacial surgery.

Keywords

Maxillofacial Surgery
Head and Neck Surgery
Traumatology
Deformations
Oncology
Infections

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
