

Special Issue

Environmental Applications of Char Materials: Pyrochar and Hydrochar

Message from the Guest Editors

Research in chars is growing exponentially due to the large number of applications, including soil and water applications, fuel, horticultural growing media, building material, and use as a catalyst. Chars are usually obtained from pyrolysis (pyrochar or biochar) or hydrothermal carbonization (hydrochar). Their properties can be modified during or post-pyrolysis in order to engineer it for the applications mentioned before. This Special Issue welcomes submissions on environmental applications for pyrochars and hydrochars. Keywords:

- biochar
- remediation
- soil pollution

Guest Editors

Dr. Jorge Paz-Ferreiro

Prof. Dr. Ana Méndez

Prof. Dr. Gabriel Gascó Guerrero

Prof. Dr. Cícero Célio de Figueiredo

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
