

Special Issue

Chemical Composition, Properties and Applications of Honey

Message from the Guest Editors

Honey is a product widely consumed all over the world and it is particularly known for both its nutritional and therapeutic qualities. Known since prehistoric times, honey is a versatile product which is qualitatively influenced by environmental conditions, its floral or extra-floral sources, and the beekeeping practices performed by the beekeepers. The purpose of this Special Issue is to gather valuable scientific information on the chemical composition of different types of honey and especially those components that imprint its particular character, such as flavonoids, phenolic acids, volatile organic acids, and enzymes. Moreover, the scientific papers dealing with the bioactive, nutraceutical, and therapeutic properties of various types of honey are welcome, as well as those describing the use of honey in other fields of life science. Research paper types, reviews, or case-study manuscripts are eagerly awaited by the editorial board.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
