

Special Issue

Computational Intelligence, Soft Computing and Communication Networks for Applied Science II

Message from the Guest Editor

There have been a number of research advances in the fields of intelligent systems and communication networks in recent years. Accordingly this special issue extends a previous body of work dealing with Computational Intelligence, Soft Computing and Communication Networks for Applied Science. Artificial and computational intelligence continues to transform all aspects of society including the use of green computing for sustainability, the modeling of intelligent healthcare systems, the design of smart transportation networks and the modeling of autonomous, intelligent, mobile vehicles. All aspects of communication systems and networks and computational intelligence will be considered in this special issue.

I thus invite you to submit your research on these topics, in the form of original research papers, mini-reviews and perspective articles.

Prof. Dr. Jason K. Levy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
