

Special Issue

Method of Detecting, Analyzing and Removal of Construction Defects in Residential Buildings

Message from the Guest Editors

The aim of this Special Issue (SI) is to present modern solutions for diagnostics of buildings, monitoring the condition of structures, but also ways to repair defects and faults with the use of modern technologies and materials. An important aspect is also the management of the process of removing defects during construction, work acceptance, and the warranty and post-warranty period. This SI would act as an international platform to showcase emergent findings and contribute to generating new knowledge in this growing field of research.

This Special Issue welcomes various submission types, such as original research contributions, case studies, comparative studies, conceptual papers, and review studies.

Guest Editors

Prof. Dr. Krzysztof Zima

Prof. Dr. Peter Mésároš

Dr. Marcela Spisakova

Dr. Damian Wieczorek

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
