

Special Issue

Ecotoxic Effects of Contamination on Marine Organisms

Message from the Guest Editor

One important issue of scientific concern is the effect of global industrialization as a major source of pollution and the fact that pollution does not respect national boundaries, damaging marine life and human health. The majority of pollutants ultimately enter the marine environment, causing adverse effects on marine organisms.

In this Special Issue, we invite submissions exploring the toxic and genotoxic effects of contaminants on marine organisms, and mechanisms by which the cells of animals and plants protect themselves against pollutants. Contributions can focus on laboratory and field studies of any marine organism, any contaminant, and modeling. The development of new methodologies for ecotoxic effect determination, case studies, and reviews are also welcomed.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
