

## Special Issue

# Feature Review Papers in Biomedical Engineering

### Message from the Guest Editor

This Special Issue aims to gather high-quality review articles highlighting recent advances, emerging technologies, and interdisciplinary developments in biomedical engineering. We welcome contributions across all areas of the Biomedical Engineering Section of *Applied Sciences*, including, but not limited to, the following: biomedical devices, biophotonics, bioinformatics of diseases, bioinstrumentation, biomedical sensors, biomedical robotics, artificial organs, health monitoring and wearable systems, biomedical signal and image processing, brain research, artificial intelligence in healthcare, and 3D bioprinting.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
