Special Issue

Applications of Machine Learning and Data Mining in Bioinformatics

Message from the Guest Editors

The integration of machine learning and data mining techniques with bioinformatics has significantly advanced our understanding of complex biological processes and revolutionized the field of computational biology. As researchers continue to explore innovative ways to analyze and interpret vast biological datasets, this Special Issue aims to showcase the latest developments and applications of machine learning and data mining methods in various areas of bioinformatics.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
