

Special Issue

Production, Storage and Utilization of Hydrogen Energy

Message from the Guest Editors

As a green and widely used source of secondary energy, hydrogen plays a critical role in creating a clean, low-carbon, safe, and efficient energy system. Currently, the development of hydrogen energy is at an early stage globally, and there is much room for development in all aspects of the industry chain, including production, storage, and utilization. This Special Issue aims to explore the latest research and insights into the advancements, problems, and challenges faced in this field, as well as to discuss the trends in future development to promote the progress of hydrogen energy technology.

Guest Editors

Dr. Fanhua Ma

School of Vehicle and Mobility, Tsinghua University, Beijing 100084, China

Dr. Shuang Li

Department of Energy and Power Engineering, Tsinghua University, Beijing 100084, China

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
