

Special Issue

AI-Driven Personalized Dental Design

Message from the Guest Editor

Recently, artificial intelligence has become deeply embedded in our daily lives, and the field of dentistry is no exception. Artificial intelligence technology for manufacturing dental prosthetics will supplement the work that humans have been doing. In addition, the database accumulated over the long term will help to manufacture more accurate and more aesthetic dental prosthetics. Therefore, there will be a lot of research in dentistry using artificial intelligence in the future, and the vision is very positive. We welcome submissions from outstanding scholars in the following fields:

- digital dentistry
- dental CAD/CAM
- intraoral scanner
- 3D printer
- CAD software

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
