

## Special Issue

# Resource and Applied Microbial Technology

### Message from the Guest Editors

Microorganisms produce indispensable raw materials for medicine, agriculture, food, environment, and industry through Resource and Applied Microbial Technology. This Special Issue covers the functional existence of microorganisms in nature; the transfer of knowledge for industrial and other applications; the application of microorganisms and their relevant enzymes and proteins in food, industry, and the environment; applied genetics and molecular biotechnology; process and products; and other relevant issues. This Special Issue welcomes full-length papers and mini-reviews of new and emerging products, processes, and technologies. **Keywords**

- molecular microbiology
- applied microbiology
- bioresource
- enzyme
- biocatalysis
- fermentation
- bioprocess
- bioremediation

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
