

Special Issue

Design for Sustainability and EcoDesign in Renewable Energy Production and Transport

Message from the Guest Editors

The recent rapid development of recycling technologies has had an important impact on wind and solar energy production and transportation. The use of these new technologies in the eco-design of modern power generation systems can eliminate mistakes and shortcomings and make them more eco-efficient. This Special Issue is entitled Sustainable Design and EcoDesign in Renewable Energy Production and Transportation. In particular, we wish to solicit contributions concerning further improvements to PV recycling technologies to decrease the environmental impacts throughout their life cycles.

Guest Editors

Prof. Dr. Michele Cali

Prof. Dr. Giuseppe Marco Tina

Prof. Dr. Hajji Bekkay

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
