

Special Issue

Advance in Digital Signal, Image and Video Processing

Message from the Guest Editors

In this Special Issue, we invite the scientific community to publish works highlighting recent advancements in digital signal, image, and video processing. The topics of interest include but are not limited to:

- Broadcasting and electronic media;
- Coding and compression;
- Content storing and management;
- Geographic information system (GIS);
- Internet technology;
- Image and video signals;
- Mobile technologies;
- Multimedia processing;
- Quality of experience (QoE);
- Quality of service (QoS);
- Speech and music signals;
- Signal processing;
- Streaming services;
- Subjective and objective metrics;
- User experience (UX).

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
