Exposure Pathways and Health Implications of Environmental Chemicals

Message from the Guest Editor

Dear Colleague,

In an era where the intricate interplay between human health and the environment takes center stage, our understanding of the Exposure Pathways and Health Implications of Environmental Chemicals becomes paramount. This call for submissions invites researchers from diverse disciplines to contribute their groundbreaking work to a Special Issue dedicated to unraveling the complexities of this critical field.

The scope spans a wide array of topics, ranging from innovative methodologies for assessing environmental chemical exposure to the latest advancements in deciphering the intricate mechanisms underlying the resultant health effects. We seek contributions that explore the exposure pathways of a myriad of environmental chemicals, including, but not limited to, pollutants, pesticides, metals, and emerging contaminants, as well as their potential impacts on human health. Emphasizing a multidisciplinary approach, we encourage submissions that employ cutting-edge techniques in analytical chemistry, toxicology, epidemiology, and environmental sciences to elucidate the dynamic relationship between exposure to environmental chemicals and the subsequent health outcomes.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
