

Special Issue

New Approaches to Water Treatment: Challenges and Trends, 2nd Edition

Message from the Guest Editors

The objective of this Special Issue is to gain insights into the main challenges and trends related to water treatment (e.g., drinking water, rainwater, desalination, wastewater, etc.). Articles focused on the development of new technologies and digitalization in water treatment are also of interest. We welcome the submission of original research articles, both methodological and experimental, and reviews covering all issues related to the abovementioned topics. Possible topics of interest include, but are not limited to, the following:

- Drinking water treatment;
- Desalination;
- Rainwater purification systems;
- Wastewater treatment;
- Reclaimed water and wastewater reuse;
- Modeling and simulation;
- Digitalization;
- Water–energy nexus;
- Energy optimization.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
