

Special Issue

Mass Customization Manufacturing Systems: Challenges, Concepts, and Implementation

Message from the Guest Editor

In the global business environment, manufacturing companies are facing several important challenges. One of them is the growing demand for products which are tailored to an individual customer's requirements. This demand has stimulated mass customization (MC), which is becoming increasingly important in production and operations management. Some of the objectives of this Special Issue are: to characterize the current trends of MC, to provide examples on how it differs from other manufacturing strategies, and to determine what the future of manufacturing will be when it takes a prevailing worldwide approach to satisfying customers' expectations. **Keywords:** configuration process models; customer-driven manufacturing; make-to-order or build-to-order; reconfigurable manufacturing systems; product platforms for mass customization; process and product modularization; modeling of mass customizable products; modeling of mass customized processes; scheduling in mass customization; strategies for mass customization; mass customization from an economic perspective

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
