

## Special Issue

# Eco-Friendly Technologies: Low-Cost and Low-Toxicity Thin Film Deposition

### Message from the Guest Editor

Many measures have been already taken to reduce the use of hazardous materials in the processing as well as the production costs. Since the majority of the manufacturing steps in the electronics industry involve different kinds of thin-film deposition, there is a strong need for finding solutions to overcome the remaining health and environmental issues associated with thin-film technologies. Here, we kindly invite authors to contribute to our new Special Issue, “Eco-Friendly Technologies: Low-Cost and Low-Toxicity Thin Film Deposition”, devoted to recent advances in the development of strategies for low-toxicity and/or low-energy processing being able to reduce raw material waste and emission of toxic agents during device manufacturing and after the disposal or abandonment. Research may cover (but is not limited to) any of the processing stages, such as formation of substrates, contacts, and interconnections; active layers in electronic devices (e.g., solar cells, FETs, LEDs, sensors); and other applications such as thin-film batteries and coatings.

### Guest Editor

Dr. Valentina Belova

European Synchrotron Radiation Facility (ESRF), 71 avenue des Martyrs,  
38000 Grenoble, France

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
