

Special Issue

Smart Education through Physical Activity and Sport

Message from the Guest Editors

In this Special Issue, we invite submissions exploring new methodologies and ideas regarding the teaching of physical education and motivation of students to practice sports. We encourage articles covering high-impact research results in the field of PE, PA and sports. Both theoretical and experimental studies are welcome, as well as comprehensive review and survey articles.

Topics of interest for this Special Issue include, but are not limited to: Health, physical activity and sport for students;

Sport, exercise and physical activity for all;

Formal and nonformal motor activities;

Fitness and leisure activities;

Motivation in sports, physical education and physical activity;

Strategies to encourage sport and exercise participation;

Barriers to sports and physical activity;

Students' sports performance;

Sport engineering;

Trending technologies in sport;

Monitoring sport and physical activity—measurement and evaluation;

Motor learning and control;

Computer vision in sport;

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
